## FMR-7036 Fire Annunciator Keypad

www.boschsecurity.com

The FMR-7036 is a four-wire LCD annunciator keypad used with the FPD-7024 Fire Alarm Control Panel (FACP) to establish the location of a fire alarm. The two-line, 16 -character display is capable of showing all messages normally displayed on the control panel. All alarm and status messages are included. Four on-board LEDs provide easy reading of the annunciator's status from a distance. There are Silence and Reset buttons for controlling annunciator and control panel operation. A built-in keyswitch offers extra security by locking the annunciator to prevent unwanted sounder silencing or control panel resetting.

| Certifications and Approvals |  |  |
| :--- | :--- | :--- |
| Region | Certification |  |
| USA | UL | UOXX: Control Unit Accessories, System <br> (ANSI/UL 864) |
|  | FM |  |

- Compatible with FPD-7024 Fire Alarm Control Panel
- Two-line, 16-character LCD display
- On-board LEDs indicate Silenced, Trouble, Alarm, and Supervisory
- Silence and Reset buttons
- Built-in keyswitch

Installation/Configuration Notes
Compatible Products

| Category | Product ID | Product Description |
| :--- | :--- | :--- |
| Control Panels | FPD-7024 | Four-zone FACP |

## Mounting

The FMR-7036 can be surface mounted on a standard three-gang box, or with the mounting backplate provided.

## Wiring Guidelines

For the FPD-7024 FACP, the maximum allowed DC current draw from the option bus is 500 mA for keypads. The maximum length of wire (all branches added together) that can be connected to the option bus terminals is $4000 \mathrm{ft}(1220 \mathrm{~m})$.
The maximum length between any one device and the control panel terminals depends on the current draw on the branch that the device is on. The current draw on a particular branch can be found by adding together the individual current draws of each device connected to the branch.

## Notice

Refer to the FPD-7024 Installation Guide (P/N: F01U008458) for complete wire length calculations.

## Number of Keypads

Up to four keypads can be used per system. Up to three keypads can be used on any single 1000 ft ( 305 m ) run of 18 AWG ( 1.2 mm ) wire.

## Parts Included

Quant.
Component
1 LCD annunciator keypad
1 Literature pack

## Technical Specifications

## Environmental Considerations

| Environment: | Indoor, dry |
| :--- | :--- |
| Relative Humidity: | Up to $95 \%$, non-condensing |
| Temperature (operating): | $+32^{\circ} \mathrm{F}$ to $120^{\circ} \mathrm{F}\left(0^{\circ} \mathrm{C}\right.$ to $\left.+49^{\circ} \mathrm{C}\right)$ |

## Mechanical Properties

| Base Dimensions (HxW): | $4.6 \mathrm{in} . \times 8.2 \mathrm{in} .(11.7 \mathrm{~cm} \times 20.8 \mathrm{~cm})$ |
| :--- | :--- |
| Cover Dimensions (HxW): | $4.3 \mathrm{in} . \times 8.1 \mathrm{in} .(10.9 \mathrm{~cm} \times 20.6 \mathrm{~cm})$ |

## Power Requirements

| Current (Alarm): | 100 mA |
| :--- | :--- |
| Current (Standby): | 80 mA nominal |
| Voltage (Operating): | 12 VDC nominal |

## Ordering Information

FMR-7036 Fire Annunciator Keypad
Four-wire LCD annunciator keypad used with the FPD-7024 Fire Alarm Control Panel to establish the location of a fire alarm
Order number FMR-7036

## Accessories

## KEY-ANN Replacement Key

This is a spare or replacement key for the FMR-7036 lock.
Order number KEY-ANN
